I am a long haul truck driver and benefit from hearing the traffic and weather. I feel xm should be left alone because I pay for these services and its not going to effect the public radio stations because they dont listen or subscribe to xm radio and have no idea what xm is doing. XM allows me to make the most of my time and deliver freight on time so that consumers get their merchandise on time. I know when to avoid traffic or weather so that there is no accident or back up. Again, If I want to listen to public radio I could turn my xm off and listen. However there are places that there is no radio service at all and xm helps me at those places all so.
